eTools 2009 Update Log

List of Items fixed in release 10.0.45.0 (SP2) (Dated September 9, 2009)

1. Employee/Activity groups are not transferred which restricts us to transfer the line items of SFS in which we use employee/activity groups. - Fixed

2. Apply filters to vendor/employee/client/activity/expense now send the data using Email Later option. We see while receiving activity data, client data gets saved in the activity table. - Fixed

3. Make two Service Fee or Expense Fee Schedules. First line item has Employee+ Activity combination and second line item has Employee Vendor group + Activity group combination. Now send all data (i.e. Employee, Activity, Expense, etc) along with groups to target database through eTools. We noticed that second line with group combination did not get transferred. - Fixed

4. Send employee/project control via "Email Later" option. On receiving the data an error message is displayed with description as "cannot write to closed text writer" and thus employee/project control is not transferred. - Fixed
